

Trolley Fabrication	•	Procedure
---------------------	---	-----------

Automatic welding and UT/RT inspection

•	Solution
---	----------

High precision, smaller tolerance□ stable dimension, high efficiency

Gearing	•	Procedure
---------	---	-----------

Material: CrNiMo alloy

Automatic production line

CNC hobbing machine

Carbonizing hardness

Finish grinding

•	Solution
---	----------

High precision□ Harden gear□ High stress□

High tenacity□ Long life

High precision grinding Procedure

Wheels

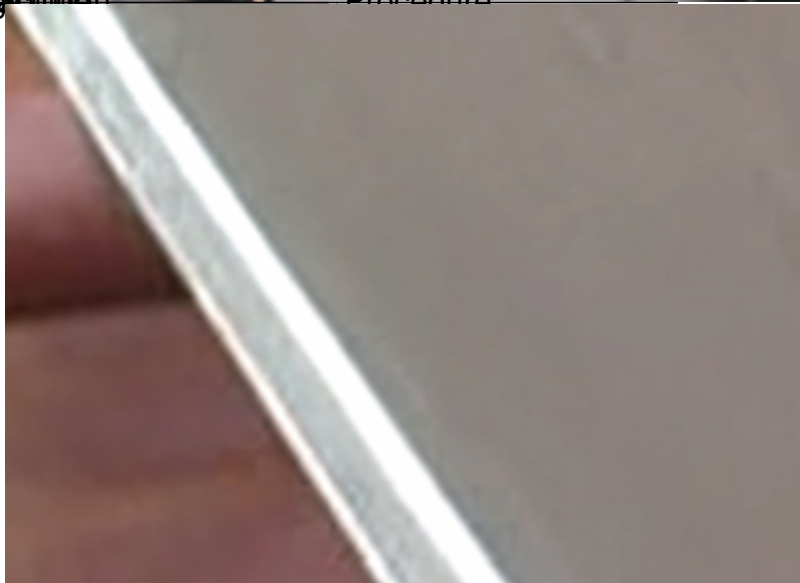

Procedure

GGG70

NC

High precision grinding Procedure

High precision grinding

Procedure

CNC Cutting the whole Adjust

Business by providing a solution that meets the needs of the customer. The overall goal is to provide a solution that meets the needs of the customer.
